

Josué Carrillo Paurinotto

AI-Native Product Builder — Software, Automation & Agents

Lima, Peru (open to remote, LATAM-based) · josuecarrillop02@gmail.com · +51 922 701 475 · Advanced English & native Spanish

Industrial Engineering student and AI-native product builder with hands-on experience shipping software, AI agents, and automation systems end-to-end — combined with prior experience in entrepreneurship, operations, sales, and client management. Comfortable moving from an ambiguous business problem to a working, deployed system.

EXPERIENCE

Prophecy — UNO (AI-native enterprise platform)

Product / AI Engineer · Aug 2026 – Present

- Own the Communications experience end-to-end (channels, DMs, threads, reactions, unread state, drafts) — hardened optimistic updates, cache reconciliation, request cancellation, and failure recovery in a React/TypeScript SPA.
- Led an idempotent Slack→UNO data migration: 17 channels, 1,033 messages, 536 replies, 198 reactions, 141 files, with validation and reconciliation so it could be re-run safely.
- Built an AI agent on the OpenAI Responses API with tool-calling, human-authorized actions, and exactly-once execution guarantees for operating on real project/task data.
- Work across the stack (Laravel, PostgreSQL, WebSockets/Laravel Reverb, Nginx) and use AI coding agents (Claude Code, Codex) daily as a development multiplier — independently reviewing, debugging, and validating every generated change before it ships.

N8N & AUTOMATION PROJECTS

- **Press & Breathe** — production n8n workflow (live since Sep 2026): webhook trigger with secret-header validation, conditional business-rule lookups, and dynamically templated email notifications via Gmail.
- **AI Leads Agent** — conversational n8n workflow: an AI Agent with session memory that qualifies inbound leads through natural conversation, persists structured data to a database as it learns it, and triggers a human handoff by email when it detects high intent.

INDEPENDENT PROJECTS

- **Press & Breathe** — live production site for a yoga-teacher-training program (Next.js + Supabase + n8n), shipped and verified end-to-end.
- **Personal AI OS** — a persistent multi-agent orchestration system (OBSERVE→PLAN→ACT→VERIFY→REFLECT) with sandboxed execution, git-policy hardening, and 300+ tests.
- **Casa Azul & Winter Arc** — reservations/payments admin and a fitness-tracking PWA (Next.js + Supabase).

ENTREPRENEURSHIP & OPERATIONS

- Cofounder & Financial Lead, corporate events production (2025–2026) — managed a portfolio of 5 projects (\$70K–125K each, >\$350K monitored) at a ~25% average net margin.
- Founded and ran a fitness-apparel e-commerce operation (2021–2022) at a ~25% net margin.

EDUCATION & CERTIFICATIONS

Universidad de Ingeniería y Tecnología (UTEC) — Industrial Engineering, in progress (started 2019, expected ~2027)

Bloomberg Market Concepts — Economics, Currencies, Fixed Income, Equities

SKILLS

Frontend/Product: React, Next.js, TypeScript, Tailwind, Vite

Backend/Data: Laravel, PostgreSQL, Supabase, REST/JSON APIs

AI & Automation: n8n (Chat Trigger, AI Agent, Data Tables, tool-calling), OpenAI/Anthropic APIs, Codex, Claude Code

Tools: Git (worktrees, rebase, cherry-pick), Python, SQL, Excel
